Sir:

Responsive to the Office Action dated November 12, 1998, please amend the above identified application as follows:

IN THE CLAIMS:

Please amend Claim 1 as follows:

1. (Thrice Amended) An apparatus for controlling a computer operation based on one or more stimuli sensed from at least one user thought and wherein the computer includes user controls, said apparatus comprising:

(a) magnetic source imaging means [stimuli input means] coupled to the user, said magnetic source imaging means including means for identifying the location, within
